

applied nonlinear control slotine pdf

Various types of stability may be discussed for the solutions of differential equations or difference equations describing dynamical systems. The most important type is that concerning the stability of solutions near to a point of equilibrium. This may be discussed by the theory of Lyapunov.

Lyapunov stability - Wikipedia

An adaptive control strategy based on a fuzzy logic system by introducing a nonzero time-varying parameter is studied for an n -link manipulator system with the condition of a complex environment. At the beginning, a universal approximator with a one time-varying parameter is proposed based on the analysis of the fuzzy logic system, which is utilized to equalize uncertainties in robot ...

Fuzzy Adaptive Switching Control for an Uncertain Robot

IEEE Transactions on Neural Networks is devoted to the science and technology of neural networks, which disclose significant technical knowledge, exploratory developments, and applications of neural networks from biology to software to hardware.. This Transactions ceased production in 2011. The current retitled publication is IEEE Transactions on Neural Networks and Learning Systems.

IEEE Xplore: IEEE Transactions on Neural Networks

This paper presents a process for the estimation of tire–road forces, vehicle sideslip angle and wheel cornering stiffness. The method uses measurements (yaw rate, longitudinal/lateral accelerations, steering angle and angular wheel velocities) only from sensors which can be integrated or have already been integrated in modern cars.

Estimation of vehicle sideslip, tire force and wheel

On souhaite contrôler la température d'un four. La première tâche consiste à définir le système « four ». Celui-ci possède une entrée (le courant fourni à la résistance de chauffage) et une sortie (la température à l'intérieur du four).
