Euclidean geometry is a mathematical system attributed to Alexandrian Greek mathematician Euclid, which he described in his textbook on geometry: the Elements.Euclid's method consists in assuming a small set of intuitively appealing axioms, and deducing many other propositions from these.Although many of Euclid's results had been stated by earlier mathematicians, Euclid was the first to show ...

Early geometry. The earliest recorded beginnings of geometry can be traced to early peoples, who discovered obtuse triangles in the ancient Indus Valley (see Harappan Mathematics), and ancient Babylonia (see Babylonian mathematics) from around 3000 BC.Early geometry was a collection of empirically discovered principles concerning lengths, angles, areas, and volumes, which were developed to ...

2.7. Mathematical optimization: finding minima of functions. Authors: GaÃ«l Varoquaux. Mathematical optimization deals with the problem of finding numerically minimums (or maximums or zeros) of a function. In this context, the function is called cost function, or objective function, or energy.. Here, we are interested in using scipy.optimize for black-box optimization: we do not rely on the ...
