

database testing multiple choice pdf

A database is an organized collection of data, generally stored and accessed electronically from a computer system. Where databases are more complex they are often developed using formal design and modeling techniques. The database management system (DBMS) is the software that interacts with end users, applications, and the database itself to capture and analyze the data.

Database - Wikipedia

Database routers¶. A database Router is a class that provides up to four methods: db_for_read(model, **hints)¶. Suggest the database that should be used for read operations for objects of type model. If a database operation is able to provide any additional information that might assist in selecting a database, it will be provided in the hints dictionary.

Stall Speed at $C_{lmax}=x.xx$ - This appears only on the in-flight analysis, and only if the wing area and airframe weight were specified for the model. It indicates the range of speeds which are at or below the aircraft's stall speed at the maximum lift coefficient (i.e. the speed below which the aircraft cannot fly).
