Bloom's taxonomy is a set of three hierarchical models used to classify educational learning objectives into levels of complexity and specificity. The three lists cover the learning objectives in cognitive, affective and sensory domains. The cognitive domain list has been the primary focus of most traditional education and is frequently used to structure curriculum learning objectives ...

Bloom's taxonomy - Wikipedia

Constructivism is a philosophical viewpoint about the nature of knowledge. Specifically, it represents an ontological stance.. There are many flavors of constructivism, but one prominent theorist is Jean Piaget, who focused on how humans make meaning in relation to the interaction between their experiences and their ideas. He considered himself to be a genetic epistemologist, meaning he was ...
