ACI 347 giude to formwork for concrete.pdf | Framing

Formwork and concrete form types. Formwork comes in several types: Traditional timber formwork. The formwork is built on site out of timber and plywood or moisture-resistant particleboard. It is easy to produce but time-consuming for larger structures, and the plywood facing has a relatively short lifespan.

Formwork - Wikipedia

Introduction. This Stramit PrimeForm™ Left-in-place Formwork System Technical Manual includes product features as well as installation techniques and formwork design data. Features include: Long spanning formwork that saves time by removing the need for propping joists. Left-in-place formwork eliminates the need for removal, cleaning and storage.

CCAA T57 Guide

Rammed earth walls are constructed by ramming a mixture of selected aggregates, including gravel, sand, silt and a small amount of clay, into place between flat panels called formwork. Traditional technology repeatedly rammed the end of a wooden pole into the earth mixture to compress it. Modern technology replaces the pole with a mechanical ram.

POST-TENSIONING IN BUILDING STRUCTURES

Insulating concrete form or insulated concrete form (ICF) is a system of formwork for reinforced concrete usually made with a rigid thermal insulation that stays in place as a permanent interior and exterior substrate for walls, floors, and roofs. The forms are interlocking modular units that are dry-stacked (without mortar) and filled with concrete. The units lock together somewhat like Lego ...
