Histological Typing of Tumours of the Gallbladder and

The authors of this new WHO classification 1 of lung tumours are to be congratulated on tackling many of these issues, taking into account recent advances in biological knowledge of some of these tumours, and providing clear and firm criteria for classifying many of the tumours. Hopefully, this will lead to greater consistency in histological typing and make published studies easier to compare and interpret.

Histological typing of lung and pleural tumours: third

Histological Typing Histological typing divides tumours of a given organ into different types according to their direction of differentiation. Although this may frequently indicate the underlying histogenesis of the tumour, it may be difficult or impossible to identify the cell of origin.
