Insect morphology is the study and description of the physical form of insects. The terminology used to describe insects is similar to that used for other arthropods due to their shared evolutionary history. Three physical features separate insects from other arthropods: they have a body divided into three regions (head, thorax, and abdomen), have three pairs of legs, and mouthparts located ...

The international non-governmental organization Human Rights Watch (HRW) has been the subject of criticism from a number of observers. Critics of HRW include the national governments it has investigated, NGO Monitor, the media, and its founder (and former chairman), Robert L. Bernstein. The criticism generally falls into the category of alleged bias, frequently in response to critical HRW reports.
