How to use this publication. This publication is designed to alert companies, investors, and other capital market participants to the major differences between IFRS and US GAAP as they exist today, and to the timing and scope of accounting changes that the standard setting agendas of the IASB and FASB (collectively, the Boards) will bring.

An audit is a systematic and independent examination of books, accounts, statutory records, documents and vouchers of an organization to ascertain how far the financial statements as well as non-financial disclosures present a true and fair view of the concern. It also attempts to ensure that the books of accounts are properly maintained by the concern as required by law.

Fund accounting is an accounting system for recording resources whose use has been limited by the donor, grant authority, governing agency, or other individuals or organisations or by law. It emphasizes accountability rather than profitability, and is used by Nonprofit organizations and by governments. In this method, a fund consists of a self-balancing set of accounts and each are reported as ...
