Introduction to Semi-Supervised Learning (Synthesis Lectures on Artificial Intelligence and Machine Learning) [Xiaojin Zhu, Andrew B. Goldberg, Ronald Brachman, Thomas Dietterich] on Amazon.com. \*FREE\* shipping on qualifying offers. Semi-supervised learning is a learning paradigm concerned with the study of how computers and natural systems such as humans learn in the presence of both labeled and ...

The task evaluates systems for the large-scale detection of sound events using weakly labeled data. The challenge is to explore the possibility to exploit a large amount of unbalanced and unlabeled training data together with a small weakly annotated training set to improve system performance.

Supervised injection sites (SIS) (also known as supervised injection facilities, safe injection sites fix rooms, safer injection facilities (SIF), drug consumption facilities (DCF) or medically supervised injection centers (MSIC)) are legally sanctioned, medically supervised facilities designed to provide a hygienic and stress-free environment in which individuals are able to consume illicit ...

Deep convolutional neural networks (CNNs) are the backbone of state-of-art semantic image segmentation systems. Recent work has shown that complementing CNNs with fully-connected conditional random fields (CRFs) can significantly enhance their object localization accuracy, yet dense CRF inference is computationally expensive.

Charles Erwin Wilson (July 18, 1890 – September 26, 1961) was an American engineer and businessman who served as United States Secretary of Defense from 1953 to 1957 under President Dwight D. Eisenhower. Known as "Engine Charlie", he was previously the president and chief executive officer of General Motors. In the wake of the Korean War, he cut the defense budget significantly.
