Results. Upon reviewing the previously highlighted guidelines and the practices that are widely applied in the pharmaceutical industry, it was noticed that there is an abundant number of papers and articles that explain the general guidelines and practices but the literature lack those describing application; case studies of the pharmaceutical factories applying those guidelines and ...

Quality in the pharmaceutical industry – A literature

ISO 14000 – Environmental Management System (EMS), ISO 9000 (Quality Management System) and ISO 27001 (Information Security Management System) are the most widely used standards in the pharmaceutical industry. These standards provide a framework for organizations to manage their environmental, quality and information security risks. The ISO 14000 standard is particularly relevant for pharmaceutical companies as it helps them to reduce their environmental impact and improve their operational efficiency. The ISO 9000 standard is also important as it ensures that pharmaceutical products are consistently of high quality. The ISO 27001 standard is crucial for pharmaceutical companies as it helps them to protect their sensitive information from cyber threats.
