The Davis Drug Guide will always be my go to for IN-DEPTH med info, but so far, I am liking the Mosby's Pharm NoteCards. I am a nursing student and I'm using this to cement the information I learned in my nursing previous nursing courses and most recently taken pharmacology course (being that it was a 6-week summer course, we did not have enough time to go as in depth as I would have liked).

The electric axis of the heart is the net direction in which the wave of depolarisation travels. It is measured using an electrocardiogram (ECG). Normally, this begins at the atrioventricular node (AV node); from here the wave of depolarisation travels down to the apex of the heart. The hexaxial reference system can be used to visualise the directions in which the depolarisation wave may travel.
