In fluid dynamics, drag (sometimes called air resistance, a type of friction, or fluid resistance, another type of friction or fluid friction) is a force acting opposite to the relative motion of any object moving with respect to a surrounding fluid. This can exist between two fluid layers (or surfaces) or a fluid and a solid surface. Unlike other resistive forces, such as dry friction, which ...

There are at least four possible positions on the thermodynamics of weight gain: 1. Weight gain does not depend on calories in versus calories out, even in the loosest sense. 2. Weight gain is entirely a function of calories in versus calories out, but calories may move in unexpected ways not linked ...
