This book describes the process of analyzing data. The authors have extensive experience both managing data analysts and conducting their own data analyses, and this book is a distillation of their experience in a format that is applicable to both practitioners and managers in data science. Printed copies are available through Lulu.

Alfred H. Burne wrote, "War is an art rather than a science; it is waged between human beings, and involves the interplay of their respective characters. Science does not recognize sentient beings as such."6 Thus, the friction of war and the animate nature of the participants made war more an art than a science.
